

Finding & Writing A Health and Medical Research Grant

Your Presenter

Mark Smith

Mark is passionate about medical / biomedical research and has over thirty years experience in research, research development and all aspects of research grants management. His background in both the health and university sectors has given him a strong understanding and appreciation of researchers requirements and of research policy and practice.

ERITER CONSULTING
BIOMEDICAL SOLUTIONS

In this seminar series you will learn how to find Australian health and medical research grants, then how to plan and write a competitive research grant application.

The course is aimed at new and novice researchers, but even those with research grant experience will find something useful.

What the Course Covers

Session 1 ♦ Australian research grant categories ♦ Examples of Federal, State & other funding body grants ♦ Finding research grant opportunities ♦ Developing a research grant application strategy

Session 2 ♦ Writing a project outline ♦ Building your research team ♦ Getting informed ♦ Writing a project plan ♦ Planning your writing ♦ The administrative parts of the application ♦ The budget

Session 3 ♦ Writing the research proposal ♦ Approach ♦ Audience ♦ Structure ♦ Language & Style ♦ Formatting

What Others Say

Mark has extensive experience in grant writing/review, which was so obvious in this educational seminar series. He made grant writing sound so easy and fun that I might think about writing another one (after a 5-year break!). If you are thinking about educating your researchers in grant writing, I recommend using Mark and Eriter Consulting.

Dr Bente Talseth-Palmer. Research Strategy Lead, NSW Health Pathology
Through his years of experience, he understood .. how to pitch a successful application. This was very helpful for new and experienced researchers alike.

A/Prof Eddy Kizana. Cardiologist, Westmead Hospital & Sydney University

What It Costs

The series of three 30-40 minutes seminars costs \$1500 (ext GST). Seminars are run virtually. Client requested modifications to the standard material will attract an addition charge. Quote provided on request.
